

```
We will make all server pointers as it is
  List* List: Front Backsplit () { isciées con la rein de l'
          List* part 2 = new list; our split 9 iden gil
          Assert (part 2!= NULL);
          int i = 0;
         Link temp - head;
         while (temp = NULL) {
               temp = temp > next;
        if (i'2=0) & = if (i'2==0) i++;
We'd so (i = 1/2) temp=head;
           for (int j=0; j < i; j++)
              temp = temp > next;
           Link temptail = tail;
          this tail = temp; tail -> next = Null; = = list / die:
          part 2 -> head = temp > next;
          part2 -> Jail = temptail;
           return part 2;
```
